TroClose™ 1200

Novel Integrated Port Closure System
Gordian Surgical's TroClose™1200 is a novel integrated port closure system that offers surgeons a simple, secure and safe solution to open and suture closed the abdominal wall during laparoscopic procedures.

Instead of insertion of closure sutures into the fascia at the end of a procedure, Gordian's uniquely designed "two in one" trocar efficiently inserts sutures into the tissue surrounding the cannula at the beginning of the procedure. When the cannula is removed, the surgeon closes the fascia by simply tying the TroClose™1200 sutures together.
Technical Specifications

- 12 mm bladeless trocar
- 115 mm ribbed cannula
- Single-use only
- EtO sterilized
- Fully absorbable PLGA anchors
- Braided PGLA absorbable sutures (similar to USP 0)
